### QUANTITY TO USE PER 100 SQ. FT.

Vigoro. For lawns, shrubs or gardens, about 2 to 3 lbs. early in the spring. Repeat in about 6 weeks with half the amount, and for lawns repeat again in late summer. Work well into the soil or wet down thoroughly immediately after applying.

Caution: Do not use on foliage or stalks unless dry, and then wet down immediately and thoroughly. This also applies to lawns.

Prices of bonemeal, sheep manure, and other fertilizers may be had on application

Bonemeal and Pulverized Sheep or Cattle Manure. Use 4 to 6 lbs. of either of these per 100 sq. ft., or mix Bonemeal and pulverized Cattle Manure in equal quantities and use the same way. Repeat later as with Vigoro.

Bonemeal and Pulverized Sheep or Cattle Manure are safe fertilizers, and will not burn.

## PEAT MOSS

### To Add Humus to Your Lawn

Peat Moss is one of the best materials we know of to add necessary humus to your lawn. It is clean, odorless and has great water absorbing and retaining power. It is **absolutely free from weeds** and for this reason is much preferable to manure. Peat Moss makes heavy land more friable and sandy soil hold moisture better. Dig it in the top 4 inches for new lawns. On established lawns—a dressing applied in the late fall and again in the spring is very beneficial. A bale contains about 20 bushels or more loose material tightly compressed; enough to cover 200 square feet 1 inch deep. Peat Moss can be used for the new lawn; for the established lawn; for Rose and flower beds; for other garden uses; as a winter mulch.
